ESSAY

BLACKNESS AS FIGHTING WORDS

*Etienne C. Toussaint**

“It’s in they job description to terminate the threat / So 41 shots to the body is what he can expect.” — Talib Kweli, *The Proud*¹

“I believe that this nation can only heal from the wounds of racism if we all begin to love blackness. . . . That which is best within us, . . . that which is faltering, which is wounded, which is contradictory, incomplete.” — bell hooks²

we would often form a circle around the contenders, laughing as they hurled jokes back and forth about athletic ability or sneaker selection or skin color into the cypher. “You so stupid you tried to save a fish from drowning.” “You so ugly even Hello Kitty said goodbye.” “You so black you gotta wear white gloves to eat chocolate.” But inevitably, as soon as someone uttered that dreaded phrase—“Yo mama”—the playful exchange always took a turn for the worse. We all knew there was no turning back at that point. In the South Bronx, those were fighting words.

As a Black youth roaming New York City’s urban metropolis in the 1990s, mastering the nuances of fighting words was critical to maintaining close friendships and keeping potential enemies at bay. However, in the age of Donald Trump, fighting words have taken on new meaning. In response to sharp critiques of his political agenda—from assertions that his tax reforms benefit the wealthy, to contentions that his Muslim bans have incited political Islamophobia, to revelations that his trade manipulations influence immigration policy⁴—Trump’s brazen rhetorical style has transformed the bully pulpit into a stage for bullying.⁵ Whereas the fighting words of my youth reflected bruised egos and shallow differences of opinion, the fighting words of Donald Trump have normalized “racist, sexist, homophobic, and xenophobic rhetoric” from the leader of the United States that too often has fanned the flames of racial violence.⁶ With the emergence of the COVID-19 pandemic,

coupled with a new onslaught of citizen murders at the hands of police officers, Donald Trump's presidency—one marred by impeachment proceedings on charges of abuse of power and obstruction of Congress⁷—has devolved into social unrest, nationwide uprisings, and the unraveling of law and order.⁸

The resurgence of worldwide protests by racial justice activists has ushered in a global reckoning with the meaning of this generation's rallying cry—"Black Lives Matter."⁹ As cities emblazon their streets with this expression in massive artistic murals,¹⁰ the Trump administration has responded with the militarized policing of non-violent public demonstrations, revealing not merely a disregard for public safety, but far worse, a concerted dismantling of protestors' First Amendment rights.¹¹ Yet despite a surging pandemic, Black Lives Matter ("BLM") protests have persisted.¹² Accordingly, this Essay considers the implications of

this generation's acclamation of Black humanity amidst the social tensions exposed during the age of COVID-19. What does the Trump administration's militarized response to BLM protests mean in a world mutilated by the scars of racial oppression, a wound laid bare by America's racially biased, aggressive, and supervisory culture of policing?

In response, this Essay suggests and defends a singular contention: Black identity itself, or "Blackness"¹³—whether articulated by the pure speech of racial justice activists who affirm Black humanity, or embodied by the symbolic speech of Black bodies assembled in collective dissent in the public square—has become "'fighting' words" in the consciousness of America, a type of public speech unprotected by the Constitution.¹⁴

¹³ Articulating a robust definition of "Blackness" is beyond the scope of this Essay, but a few points are noteworthy. First, this dialogue does not presume an a priori concept of Blackness, that is, one divorced from the discourses and embedded interests that seek to name it. Second, there is a subtle distinction between "Black" and "Blackness"—while Black is a racial identity that generally "implies the presence of a significant amount of melanin in one's skin," the term Blackness implies something else, "a shared set of historical, social, and cultural mores[,] . . . a sociocultural marker indicating that one acts in culturally specific ways." Rone Shavers, *Fear of a Performative Planet: Troubling the Concept of "Post-Blackness"*, in *The Trouble with Post-Blackness* 81, 82 (Houston A. Baker Jr. & K. Merinda Simmons eds., Colum. Univ. Press 2015). As a result, Blackness is a contested concept. Many performative markers of Blackness do not originate from Black culture, but they instead are imposed upon it, imbuing the concept of Blackness with both a masking and revelatory nature. See *id.* at 84. Third, notwithstanding the contested nature of Blackness as a sociocultural concept that defines both ethnic and racial identity, this Essay embraces the notion of Blackness evoked by Paul Gilroy as a "'changing' same." Paul Gilroy, *Sounds Authentic: Black Music, Ethnicity, and the Challenge of a Changing Same*, 11 *Black Music Rsch. J.* 111, 111 (1991). While the performative aspects of Blackness are always evolving, Blackness continues to reflect the unwavering tradition of freedom struggle in response to the enduring mythologies of white supremacy. See *id.* at 113, 122–23, 134–35 (arguing against essentialism in Black cultural analysis, but concluding that concepts of Blackness, particularly as expressed in music, can authentically change over time and diversify, even if rooted in similar stories and the same history).

¹⁴ See *Chaplinsky v. New Hampshire*, 315 U.S. 568, 572 (1942) ("'[F]ighting' words . . . [are] those which by their very utterance inflict injury or tend to incite an immediate breach of the peace. It has been well observed that such utterances are no essential part of any exposition of ideas, and are of such slight social value as a step to truth that any benefit that may be derived from them is clearly outweighed by the social interest in order and morality."); see also *Feiner v. New York*, 340 U.S. 315, 320 (1951) (holding similarly that "breach[es] of the peace" are not protected by the First Amendment because "[w]hen clear and present danger of riot, disorder, interference with traffic upon the public streets, or other immediate threat to public safety, peace, or order, appears, the power of the State to prevent or punish is obvious" (quoting *Cantwell v. Connecticut*, 310 U.S. 296, 308 (1940))).

The very utterance of the phrase “Black Lives Matter” tends to incite imminent violence and unbridled rage from police in city streets across America. Discussions of “Black Lives Matter” by pundits tend to conjure images of subversion, disorder, and looting, the racialized narratives of social unrest commonly portrayed by the media.¹⁵ Yet the words “Black Lives Matter” and the peaceful assembly of Black protestors also encapsulate the righteous indignation burning in the hearts of minoritized citizens. Discussions of “Black Lives Matter” by activists and scholars evoke what Cornel West calls the “prophetic pragmatism” of the Black radical tradition, a historic commitment to the democratic ideals of equality and liberty amidst entrenched systems of racial subordination.¹⁶

This dynamic reflects unresolved tensions in the First Amendment’s treatment of racial relations in America, a wrenching of the spirit that Critical Race Theorists Richard Delgado and Jean Stefancic argue “lies at the heart of two of our deepest values—civil rights and equal respect, on the one hand, and freedom of speech on the other.”¹⁷ While the First Amendment is often heralded as an exemplar of American legal exceptionalism,¹⁸ in practice it has become, as Justin Hansford declares, “a racial project.”¹⁹ Similar to Cheryl Harris’s *Whiteness as Property*,

which unmasked the way race neutrality in law and public policy rationalizes the “property” rights of white privilege,²⁰ this Essay exposes how seemingly neutral constitutional constructs rationalize “the ‘iron fist’ of the penal state” in response to both traditional violent crime and peaceful public protest, smothering the constitutional rights of Black and Brown citizens by legitimating “the extra-penological functions of penal institutions.”²¹ As Devon Carbado explains, police officers routinely use violence in Black and Brown communities not to quell social disruption but rather to reinforce social control.²² Such discretionary measures, as Dorothy Roberts clarifies, pave the way for police abuse of order-maintenance policies that, similar to vague loitering laws that the Supreme Court has ruled unconstitutional, “give police a wide net to trap citizens who look dangerous” and “also allow police to discriminate against citizens based on personal prejudices.”²³ Building upon such scholarship, this Essay provides three contributions to the ongoing discourse on policing in America.

First, it reveals how racial tensions in the First Amendment—focusing specifically on ambiguities in the fighting-words doctrine—perpetuate

the racially biased, aggressive, and supervisory culture of American policing,²⁴ an approach to law enforcement that Paul Gowder calls the “command model” due to its arbitrary usage of commands to organize and control social space.²⁵ Such tensions are laid bare when peaceful assemblies of BLM protestors who petition the government for redress of racial grievances are deemed disturbances of the peace by police officers and met by violent police force, actions that implicate the fighting-words doctrine and call into question the contours of unprotected speech. Importantly, such discretionary authority reveals the misplaced focus of the fighting-words doctrine on the inability of the recipient of fighting words to restrain themselves from violence and not on the actual substance of the words spoken. This framing renders the police officer as judge, jury, and executioner when it comes to interpreting the meaning of Black protest speech.²⁶

Second, this Essay analyzes how such racial tensions in the First Amendment—as conveyed by a racially biased and aggressive police culture—cast a dark shadow over the liberty of Black and Brown citizens who experience racism at the hands of police yet avoid acts of protest for fear of bodily harm or arrest, resulting in a chilling effect on free speech.²⁷ To be sure, the fighting-words doctrine has garnered limited attention in legal scholarship,²⁸ and it might even be deemed inconsequential, as courts have narrowed its applicability to verbal disputes between citizens

and police officers.²⁹ Indeed, modern courts rarely enforce convictions based upon the usage of “fighting words” to disturb the peace.³⁰ Notwithstanding, this Essay accomplishes important philosophical work, framing foundational constitutional constructs in the context of Black lived experience, which raises disconcerting questions about the American democratic project. Does the existence of a legal regime that threatens to criminalize anti-racist public speech if it harms its target and incites an immediate breach of the peace (even if such arrests are routinely unenforced by courts) constitute a culture of suppression that silences dissent with fear of police retaliation? A rule of law driven by fear of the police not only distorts the ideal of liberty that underscores liberal democracy, but it also is eerily reminiscent of the culture of slave patrols that threatened the lives of defiant Black Americans in Antebellum America.³¹

Third, by highlighting racial tensions in the fighting-words doctrine, this Essay illuminates the embeddedness of racism in American policing culture more generally. This culture not only constructs and reconstitutes the social order by perpetuating stereotypes of minoritized communities as sites of disorder that require constant supervision, but it also degrades the dignity of Black and Brown Americans by treating them as second-class citizens unworthy of private autonomy, while hindering the broader policing goal of minimizing crime.³² Perhaps this explains why some people choose to run at the very sight of police officers. Collectively, these insights lend support toward recent demands for police abolition from activists and legal scholars,³³ which build upon a rich tradition of

abolition scholarship from Angela Davis, Ruth Wilson Gilmore, Mariame Kaba, and others.³⁴

Part I of this Essay offers a retrospective on the Author's personal discovery of the nature of *Blackness as fighting words* through the story of Amadou Diallo in the Bronx, New York. Then, Part II discusses how America's legacy of white supremacy has infringed upon the First Amendment rights of Black and Brown citizens, including during the presidential administration of Donald Trump. Next, Part III explores the origins of the fighting-words doctrine and highlights its inconsistent treatment among courts, which has inspired ambiguity regarding its present-day meaning. Part IV then reveals how such inconsistencies and ambiguities raise important questions about the limits of constitutional protection for Black and Brown citizens who encounter racism at the hands of police while engaging in acts of protest. Finally, Part V suggests that the ambiguities surrounding the Constitution's protection (or lack thereof) of anti-racist speech that incites violence and disturbs the peace explains why some police officers believe they are authorized to use force in response to non-violent BLM protests.

Taken together, this Essay contends that until we as a nation wrestle with the racial subtext of modern policing—a culture woven into law that not only silences the legitimate public protests of minoritized citizens in violation of their First Amendment rights but also rationalizes callous violence at the hands of law enforcement—Black America will remain at peril to the veil of white supremacy that looms over the American constitutional order. Importantly, this is not a call to transgress race or usher in an era of post-Blackness. In other scholarship, I note the importance of embracing the cultural specificity of Blackness to dislodge the perceived neutrality of Whiteness.³⁵ Nor is this an attempt to

essentialize Black identity or Black performativity as something to be pitied. As Imani Perry eloquently retorted, “I must turn the pitying gaze back upon any who offer it to me, because they cannot understand the spiritual majesty of joy in suffering.”³⁶ Rather, and simply, this Essay bears witness to the absurdity and perversity of state-sponsored violence at any and all affirmations of Black humanity, and beckons America to a moral reckoning.

I. LIVING IN YOUR AMERICAN SKIN

I was thirteen years old when I first learned that sometimes “fighting words” don’t require any words at all. I didn’t realize when I got off the public bus on my way home from school that the crowd of people gathered in the street near the barbershop were protestors. I didn’t know on that February afternoon why my neighbors were so angry, jumping up and down like a Sunday morning choir, each person echoing the words of a heavysset Black preacher who barked lyrics into a megaphone on an elevated platform, his permed hair waving in the wind.³⁷ I didn’t know why the mother at the front of the pack was howling, nor why the neighborhood kids hovered nearby on Huffly bikes like anxious pups learning how to hunt. I didn’t know what was happening until later that night because it was the year 1999; our modern culture of camera phones and citizen recordings of police interactions had not yet been invented. The nightly news would have to suffice.

After sneaking another Little Debbie Fudge Round from the kitchen cabinet, I learned on the Channel 4 News that the crowd of people gathered three blocks from my home were angry about an incident involving a twenty-three-year-old Black man named Amadou Diallo.³⁸ I

advent of Twitter and YouTube and Facebook, tools that might have propelled his name into the national consciousness.

That night, lying in bed below our popcorn ceiling as the sound of the Six Train thumped in the distance, I realized two truths and one lie about my South Bronx. Truth number one: in some neighborhoods, being Black could get you killed for living in your American skin.⁴⁷ Truth number two: in some neighborhoods, Black people and police officers exist in an inescapable Hobbesian state of nature, a world seemingly ruled by lawlessness, mistrust, and unchecked violence.⁴⁸ Here's the lie: my neighborhood was not one of those neighborhoods.

I wanted to believe my lie, but my precocious mind had already deduced the logical truth about my world's state of nature. I concluded that the police would be waiting outside to greet me on my way to school with a nod and bid me farewell on my return home with a wave. I concluded that in my hood, between the corner store bodega and the barbershop, Black men and police officers exist in a never-ending cypher where taunts and gibes are traded back and forth on the asphalt until someone takes it too far. I concluded that, in my South Bronx, fighting words don't require a joke about someone's mother or, quite frankly, any words at all; being Black is more than enough.

II. THUGS AND VERY GOOD PEOPLE

In 1989, U.S. Supreme Court Justice William Brennan declared in *Texas v. Johnson* that “[i]f there is a bedrock principle underlying the First Amendment, it is that the government may not prohibit the expression of an idea simply because society finds the idea itself offensive or

⁴⁷ Others realized too. Bruce Springsteen wrote a song reflecting on the story of Amadou Diallo that later sparked controversy. Other artists similarly reflected upon the tragedy of Diallo's murder. See, e.g., Wyclef Jean, *Diallo*, *on The Eclectic: 2 Sides II a Book* (Columbia Records 2000) (“Have you ever been shot forty-one times? Have you ever screamed, and no one heard you cry? . . . disagreeable.”⁴⁹ This ethic has guided a longstanding protection afforded to citizens who engage in public acts of protest. In response to Anti-Federalists who sought specific guarantees of a bill of rights against the far reaches of national governmental power,⁵⁰ James Madison drafted the First Amendment to the U.S. Constitution in the late eighteenth century as a declaration of the people’s freedom of speech, freedom to peaceably assemble, and freedom to petition the government.⁵¹ As a result, since 1791, white citizens of America have been empowered to peacefully march and demonstrate on public lands to petition the government for redress of grievances.

However, the Constitution and its Bill of Rights have maintained a complex relationship with Black America, beginning with the Africans who were enslaved as the chattel of many of the Constitution’s writers, and continuing with their descendants (including the Black descendants of the Constitution’s writers)⁵² who frequently live as nominally free but substantively second-class citizens.⁵³ Indeed, the Constitution’s declaration of free speech for “We the People” was not drafted with Black Americans in mind; they were deemed merely three-fifths of a human during its passage.⁵⁴ As a result, prior to the Civil War, enslaved Africans

of Black citizens, from restrictions on their right to assemble for leisure⁶¹ to restrictions on their right to assemble for protest.⁶² Although Black Americans were granted access to the Constitution's Bill of Rights during the Reconstruction era, the rise of racial terrorists in the form of the Ku Klux Klan, coupled with the refusal of law enforcement to protect Black lives from the Klan's vicious acts of racial violence, stifled the First Amendment rights of an oppressed people.⁶³ Not only have Critical Race Theorists critiqued the failure of courts to regulate "the racist message of segregation" and other forms of hate speech, but they have also revealed the subordination of Black dignity interests by courts to the freedom of speech interests of white supremacists.⁶⁴ Accordingly, America's modern system of law enforcement, as Brandon Hasbrouck explains, emerges as a "badge[] and incident[]" of slavery, calling into question the constitutionality of contemporary policing culture under the Thirteenth Amendment.⁶⁵ From racial profiling to stop and frisk, pretextual stops, and the usage of excessive force—what Paul Butler has called police superpowers⁶⁶—American policing perpetuates a system of racial oppression that overwhelms Black and Brown lives.⁶⁷

To be sure, one could argue that Donald Trump's presidency has merely perpetuated the militarization of policing that followed the uprising in Ferguson, Missouri, after the killing of Michael Brown, perhaps part and parcel of Trump's authoritarian yet fundamentally neoliberal panache.⁷⁵ However, since Trump's election, a surge of anti-protest legislation has been passed in various states that empower police to arrest people for encouraging "violence" through traditionally protected forms of speech.⁷⁶ Although first introduced during the Obama administration, before President Trump took office, these bills have become increasingly commonplace since Trump's inauguration. Further, President Trump has endeavored to cement Black identity—whether evoked by public speech or embodied by free assembly—as a kind of unprotected free speech. Indeed, the violent police responses to Black Lives Matter activists, whom President Trump referred to as "THUGS,"⁷⁷ stand in sharp contrast to the relatively passive law enforcement response to armed right-wing protestors during COVID-19's anti-lockdown

Stand back and stand by.”⁸⁰ Simply put, the Trump era transcends the neoliberal politics of days past in ways that frighten ordinary sensibilities.

III. FREE SPEECH AND FIGHTING WORDS

South Carolina* (1963), declaring:

[A] function of free speech under our system of government is to invite dispute. It may indeed best serve its high purpose when it induces a condition of unrest, creates dissatisfaction with conditions as they are, or even stirs people to anger. . . . ⁸³ The Riot Act of 1714, entitled *An Act for Preventing Tumults and Riotous Assemblies, and for the More Speedy and Effectual Punishing the Rioters*, was passed by the Parliament of Great Britain to respond to “many rebellious riots and tumults” and disturbances of the peace that were deemed to “alienate the affections of the people from his Majesty.” *Id.*; see also *id.* (“That if any persons to the number of twelve or more, being unlawfully, riotously, and tumultuously assembled together, to the disturbance of the publick peace . . . and being required or commanded by any one or more justice or justices of the peace . . . to disperse themselves, and peaceably to depart to their habitations . . . remain or continue together by the space of one hour after such command or request made by proclamation . . . shall suffer death as in case of felony without benefit of clergy.”). The First Militia Act of 1792, entitled *Act To Provide for Calling Forth the Militia, To Execute the Laws of Union, Suppress Insurrections, and Repel Invasions*, similarly granted the President the power to issue a proclamation “in case of an insurrection in any state . . . [to] command such insurgents to disperse, and retire peaceably to their respective abodes, within a limited time.” *Act To Provide for Calling Forth the Militia, To Execute the Laws of Union, Suppress Insurrections, and Repel Invasions*, ch. 28, 1 Stat. 264 (repealed 1795).

is not “likely to incite or produce such action.”⁸⁶ However, while the federal government cannot generally regulate speech based on its content, it can enact reasonable, content-neutral restrictions on its time, place, and manner.⁸⁷ Additionally, some categories of speech are given limited or no protection under the First Amendment.⁸⁸ For example, some kinds of speech are considered so harmful, so injurious by themselves, their very utterance tending to incite an immediate retaliation or breach of the peace, that they are deemed outside of the Constitution’s protection. Such words are called “fighting words.”⁸⁹

The fighting-words doctrine originated in 1942 in *Chaplinsky v. New Hampshire*.⁹⁰ Mr. Chaplinsky, a Jehovah’s Witness, drew several complaints from the residents of Rochester, New Hampshire, after defaming various religious sects while proselytizing. After calling the city marshal “a God damned racketeer” and “a damned Fascist,” Chaplinsky was arrested and convicted under a state law that made it a crime to “address any offensive, derisive, or annoying word to any other person who is lawfully in any street or other public place, nor call him by any offensive or derisive name.”⁹¹ Chaplinsky appealed his conviction and challenged the law, arguing that the city ordinance violated his freedom

⁸⁶ 395 U.S. 444, 447–48 (1969).

⁸⁷ See *Ward v. Rock Against Racism*, 491 U.S. 781, 787, 796 (1989) (holding that a requirement to use sound amplification equipment and a sound technician provided by the city due to persistent noise complaints from nearby residents was a content-neutral and reasonable regulation of the place and manner of protected speech); *United States v. O’Brien*, 391 U.S. 367, 377 (1968) (upholding a restriction on expressive content and demonstrating that content-neutral restrictions may be upheld when the government has a compelling interest). The time, place, and manner restrictions imposed on the freedom to speak and assemble differ based upon the nature of the speaker’s chosen forum, which the Supreme Court has divided into three categories: traditional public forums, designated public forums, and nonpublic forums. When reviewing the constitutionality of government restrictions on speech in public and designated forums, courts use strict scrutiny. Under strict scrutiny, restrictions on free speech must further a “compelling state interest” and must be narrowly tailored to meet the goals of that interest. *Perry Educ. Ass’n v. Perry Local Educators’ Ass’n*, 460 U.S. 37, 45 (1983).

⁸⁸ See *Chaplinsky v. New Hampshire*, 315 U.S. 568, 571–72 (1942) (“[I]t is well understood that the right of free speech is not absolute at all times and under all circumstances. There are certain well-defined and narrowly limited classes of speech, the prevention and punishment of which have never been thought to raise any Constitutional problem. These include the lewd and obscene, the profane, the libelous, and the insulting or ‘fighting’ words.”).

of speech under the First Amendment.⁹² However, in a unanimous opinion, the Supreme Court held that Chaplinsky's "fighting words" incited an immediate breach of the peace,⁹³ and consequently, they were deemed unprotected speech under the First Amendment's freedom of speech clause.⁹⁴ Rather than evoking the Holmesian marketplace of ideas,⁹⁵ the Court instead considered Chaplinsky's words "of such slight social value . . . that any benefit that may be derived from them [was] clearly outweighed by the social interest in order and morality."⁹⁶ As the Court explained, Chaplinsky's epithets were "likely to provoke the average person to retaliation, and thereby cause a breach of the peace."⁹⁷

Although *Chaplinsky* has never been overruled, the Supreme Court narrowed its scope in later decisions. For example, in 1949 in *Terminiello v. Chicago*, the Supreme Court overturned the conviction of Mr. Terminiello, an ex-Catholic priest who had been convicted of breach of the peace after delivering an anti-Semitic speech to the Christian Veterans of America.⁹⁸ The Supreme Court reasoned that not only was the city ordinance not limited to unprotected fighting words, but it also considered whether Terminiello had invited dispute or brought about conditions of unrest, rendering the ordinance overly broad.⁹⁹ Justice Douglas famously declared that "a function of free speech under our system of government is to invite dispute. It may indeed best serve its high purpose when it induces a condition of unrest, creates dissatisfaction with conditions as they are, or even stirs people to anger."¹⁰⁰

The Court reached a similar result in 1971, at the height of the Vietnam War. In *Cohen v. California*, the Supreme Court overturned the conviction of Paul Cohen for disturbing the peace in violation of

California law by wearing a jacket displaying the words “Fuck the Draft” in a Los Angeles courthouse.¹⁰¹ The Court noted that the words on Cohen’s jacket were not a direct personal insult aimed at a specific person and thus could not be deemed fighting words.¹⁰² Justice Harlan concluded, “one man’s vulgarity is another’s lyric. . . . [T]he Constitution leaves matters of taste and style so largely to the individual.”¹⁰³ Some argue that an underlying tension between *Chaplinsky* and *Cohen*—the former punishing public vulgarities and the latter allowing them—has bred confusion on “defining the line between protected speech and unprotected epithets.”¹⁰⁴ Nevertheless, the fighting-words doctrine has repeatedly been invoked in state courts, particularly following tempestuous encounters between citizens and the police.¹⁰⁵

IV. POLICE OFFICERS AND BLACK BODIES

In matters involving public protests toward the perceived racist actions of police officers, the fighting-words doctrine raises important questions about the limits of constitutional protection for Black and Brown citizens. Cases like *Lewis v. City of New Orleans* (1974) and *City of Houston v. Hill* (1987), which both overturned convictions based upon local laws prohibiting the interruption of policing work with offensive language,¹⁰⁶

Court Officer Shield # 207*, 180 F.3d 409, 415 (2d Cir. 1999) (stating to a police officer, “One day you’re gonna get yours,” unaccompanied by any other action, would not rise to the level of fighting words); *Buffkins v. affirm a sense that “the First Amendment protects a significant amount of verbal criticism and challenge directed at police officers.”¹⁰⁷ In fact, many courts have argued that police officers should be held to a higher standard when exercising their policing power against those merely speaking. In *Marttila v. City of Lynchburg* (2000), a Virginia Court of Appeals overturned the conviction of a defendant who called police officers “fucking pigs” and indicated they “should be at a fucking donut shop.”¹⁰⁸ The court declared that “the First Amendment requires properly trained police officers to exercise a higher degree of restraint when confronted by disorderly conduct and abusive language.”¹⁰⁹

Some state and local governments have responded to such concerns by simply limiting the range of public speech that can be criminalized to only include “fighting words,” effectively granting police officers discretionary authority to determine what kinds of activities or public speech amount to criminal conduct. In other words, legislatures have bypassed wrestling with the underlying racial tensions between law enforcement and minoritized communities by avoiding acknowledging the prevalence of implicit racial bias among police officers altogether.¹¹⁰ Rather than question why police officers routinely use pepper spray, tear gas, rubber bullets, and other violent policing tactics in response to peaceful public protest about racial injustice, the doctrine threatens to punish people who anger police officers with their free speech.¹¹¹ As a

result, a sense of confusion remains, especially regarding public speech that decries racism at the hands of the police. Could the phrase “Black Lives Matter” and similar expressions that either affirm the dignity of Black lives or decry the injustice of institutional racism be deemed “fighting words” by police officers?

Some courts have held that public expressions of dissent to law enforcement can constitute fighting words.¹¹² For example, in *State v. Clay* (1999), the Minnesota Court of Appeals affirmed a conviction for disorderly conduct under Minnesota law based upon “fighting words” directed toward police officers.¹¹³ Minnesota police officers identified Nathan Webb Clay as a suspect in a local fight.¹¹⁴ After approaching and questioning Mr. Clay, the suspect proceeded to call one officer a “white racist motherf**ker” and accused another of racism before telling both officers “that he wished their mothers would die.”¹¹⁵ The officers arrested Clay, and the district court found him guilty of disorderly conduct.¹¹⁶ The court of appeals examined whether Clay’s speech, viewed in light of the surrounding circumstances (including the fact that it was Mother’s Day weekend), would likely provoke retaliatory violence by police officers.¹¹⁷ The court ultimately held that Clay’s speech did in fact rise to the level of fighting words, stating that “appellant’s language was directed at the officers and was not merely the expression of a controversial opinion; while calling the officers ‘white racist motherf**kers’ may be protected, wishing death upon an officer’s mother is not.”¹¹⁸

Critical Race Theorists have argued that such tensions in the implications of verbal expressions between officers and citizens reflect “the cultural structures of masculinity in the contemporary Anglo-

Griatzky*, 587 A.2d 234, 238 (Me. 1991) (holding that “abusive language challenging the officer’s authority and implicitly exhorting the assembled group to join in that challenge and to resist the order to disperse . . . presented a clear and present danger of an immediate breach of the peace even when directed toward a police officer”); *State v. American world,” causing “[m]en disempowered by racial or class status” to seek “ways of proving their manhood,” in some instances with violence.¹¹⁹ According to Angela P. Harris, among the men who predominate crime, criminal justice, and policing, “violent acts are . . . sometimes[] the result of the character of masculinity itself as a cultural ideal . . . [where] men use violence or the threat of violence . . . when they perceive their masculine self-identity to be under attack.”¹²⁰ Some scholars argue that such identity performance theories of American masculinity find roots in the “culture of honor” among white males in the American South,¹²¹ where an “ethic of self-protection” among early frontier herdsman in an atmosphere of lawlessness made it “important to establish one’s reputation for toughness—even on matters that might seem small on the surface.”¹²²

Such “culture-of-honor norms” are not only embodied in the laws and public policies of the American South,¹²³ but they have also influenced police departments across the country. Law enforcement officers who pledge an oath of honor often enact a “hypermasculine” cultural image of policing embodied by the man who is “tough and violent, yet heroic, protective, and necessary to society’s very survival.”¹²⁴ As Frank Rudy Cooper further explains, the working-class status of many male police officers catalyzes their hypermasculinity with efforts to mitigate their subordinate class status through aggressive, authoritative, and even violent policing.¹²⁵

One might conclude that it was therefore a performative culture of hypermasculinity that provoked the police officers in *Clay*, and not the underlying racial tensions stoked by Mr. Clay's proclamation that the officers were "white racist motherf**kers."¹²⁶ Perhaps yelling "yo mama" to a police officer, or in Mr. Clay's case, calling for an officer's mother's death, should appropriately be deemed fighting words because "street policing is deeply steeped in a masculine culture" and "violence is always just below the surface."¹²⁷ However, Angela P. Harris argues that racial, ethnic, and class divides trigger different expressions of masculinity that reflect power struggles among men and mediate conflicts in social life.¹²⁸ Policing—even when characterized by expressions of hypermasculinity—"follows the vectors of power established in the larger society in which white dominates nonwhite and rich dominates poor."¹²⁹ Further, "the instability of masculine identity," due to a racialized yet amorphous societal power structure, renders the prospect of violence between citizens and police as an ever-present defense mechanism.¹³⁰ Accordingly, clarifying when anti-racist speech that provokes retaliatory violence should be protected, and when such speech should be viewed as mere contestations of gender performativity, would help to make sense of the racial coordinates that comprise society's vectors of power.

By ignoring these underlying questions of agency and ascription in racial identity—how one *chooses* to perform their racial and gender identity versus how their identity performance is *perceived*—courts have published seemingly inconsistent conclusions about the meaning of fighting words. Unlike *Clay*, some courts have held expressions of dissent

In the case of *Johnson v. Campbell* (2003), the Third Circuit reversed a lower court's finding that the arrest of an African American man for disorderly conduct was constitutional.¹³² Mr. Steven Johnson was a high school basketball coach who was staying in a motel with his team in Delaware before the start of a tournament.¹³³ Johnson was reported to Delaware police by a motel employee for flipping through free newspapers in the motel's guest office.¹³⁴ The employee explained that Mr. Johnson made her nervous because the motel had been robbed five months prior by two young Black men.¹³⁵ According to the employee, "the way [Mr. Johnson] was walking and pacing around the office and his body language" scared her.¹³⁶ Upon arrival, a police officer located Mr. Johnson reading a newspaper inside of a parked car outside of the motel and attempted to detain him.¹³⁷ Mr. Johnson did not comply with requests to show identification, and after calling the police officer a "son of a bitch," Mr. Johnson was placed under arrest for his use of profane language and disturbance of the peace.¹³⁸ The court of appeals held that Mr. Johnson's constitutional rights had been violated because his words did not amount to fighting words, explaining that "Johnson's words were unpleasant, insulting, and possibly unwise, but they were not intended to, nor did they, cause a fight."¹³⁹

The difficulty that courts have faced in determining whether the Constitution protects public protests of perceived racist policing suggests that the notion of anti-racist speech as fighting words is still up for debate. Perhaps one reason for such ambiguity arises from the very concept of *disorderly* conduct, an inherently racially biased idea.¹⁴⁰ In many Black and Brown communities, police supervision has become a part of everyday life, whether employed to threaten misbehaving students in school,¹⁴¹ marginalize Black girls in the classroom,¹⁴² or reprimand homeless people sleeping on the street.¹⁴³ As Paul Gowder explains, citizen acts that undermine the command mode of police authority—or the social *order*—become a threat to order-maintenance policing—or an instance of social *disorder*.¹⁴⁴ When anti-racist speech threatens the commonplace nature of police supervisory authority—even when delivered in response to unjustified, yet ubiquitous, police aggression—it is reasonable to presume that police officers will perceive such language as “fighting words” that incite an immediate breach of the hierarchical social order.

Another reason for the ambiguity of anti-racist speech as fighting words arises from the criminalization of disobedience to police orders. Not only do citizens struggle to determine when policing tactics are

lawful,¹⁴⁵ but they also face the risk of bodily harm, or even worse, death, if they disobey a police order to challenge perceived unlawful conduct.¹⁴⁶ Further, civil rights lawsuits alleging violations of constitutional rights by police officers must confront the blue wall of silence,¹⁴⁷ the weaponry of indemnification policies¹⁴⁸ and police unions,¹⁴⁹ and the protective shield of the qualified-immunity defense.¹⁵⁰ The doctrine of qualified immunity protects police officers from suit unless the aggrieved party can show that the officer violated “clearly established statutory or constitutional rights of which a reasonable [police officer] would have known.”¹⁵¹ Following the Supreme Court’s ruling in *Pearson v. Callahan* (2009), which held that courts can first decide whether a constitutional right was “clearly established” at the time of the alleged misconduct before determining whether the alleged facts constitute a violation of a constitutional right,¹⁵² it seems that courts can simply rule that a police officer did not violate a “clearly established” constitutional right by arresting a citizen for anti-racist speech that disturbs the peace. If courts dismiss a suit on such grounds, the underlying question of whether such anti-racist speech is protected under the First Amendment remains unresolved.

Put another way, when investigating police officer liability for a claimed violation of First Amendment rights, courts do not have to resolve whether anti-racist speech unjustifiably become “fighting words”

in the minds of officers who suppress such speech or retaliate with violence. Courts can simply assert that anti-racist protest speech is not a clearly established form of protected speech under the Constitution because some citizens, including some police officers, might reasonably interpret them—e.g., protestors shouting “Black Lives Matter”—as harmful words that provoke an immediate breach of the peace. To be sure, a rich legacy of white supremacist ideology woven into the fabric of American culture underscores the “reasonableness” of perceiving anti-racist *pure* speech—spoken or written words—as a threat to the status quo, especially a status quo typified by order-maintenance policing. Even more, history reveals that the unconstrained Black body in the public square is often perceived as a threat to white supremacy, rendering Blackness itself a kind of *symbolic* speech that becomes “fighting words” in the minds of some citizens. The caricature of the Black American man as a “brute” provides but one example.

While enslaved Africans were typically portrayed as childlike and docile to assuage the moral angst of their white masters, free Black citizens were thought to be driven by animalistic tendencies and savage instincts. Not only were Black Americans after the abolition of slavery characterized as “lazy, thriftless, intemperate, insolent, dishonest, and without the most rudimentary elements of morality,”¹⁵³ but Black men in particular were deemed brutes—a man “lurking in the dark, a monstrous beast, crazed with lust. His ferocity is almost demoniacal.”¹⁵⁴ In fact, the claim that Black men were brutally raping white women was used to justify their torture and lynching during the Reconstruction era and well into the twentieth century. According to Barbara Holden-Smith, victims of public lynching by mobs “were tied to trees and while the funeral pyres were being prepared, they were forced to hold out their hands while one finger at a time was chopped off. The fingers were distributed as souvenirs.”¹⁵⁵

The racist culture of characterizing Black men as criminal and savage brutes to justify their harsh treatment and public lynching persists to this

day. For example, in 2014, Officer Darren Wilson described the eighteen-year-old Michael Brown as a superhuman “demon” that looked “aggressive” and “hostile” to clarify why he shot the Black teenager after Brown had been suspected of stealing a box of Swisher Sweets from a convenience store.¹⁵⁶ Perhaps Brown’s unconstrained and dignified Black body became symbolic speech in defiance of Wilson’s command mode of police authority and consequently was deemed a threat to Wilson’s social status.¹⁵⁷ Is it no wonder that Amadou Diallo was shot at forty-one times on suspicion of rape without uttering a single word?¹⁵⁸

Perhaps this line of reasoning has an atmosphere of conjecture. After all, charges for crimes like disturbing the police, interfering with public officials, or inciting a riot are rarely decided by invoking the fighting-words doctrine. But maybe the threat of conviction for speaking one’s mind is more than enough to sustain the racial status quo. Why else would Black and Brown parents teach their children to passively comply with police officer demands, even in the face of racially biased, aggressive, and supervisory behavior?¹⁵⁹ Why else would so many Black and Brown Americans avoid the police altogether, even when the police are Black?¹⁶⁰ As Vesla Weaver explains, the prospect of being reprimanded for peaceful protests against unlawful police behavior turns the criminal justice system into “a site of racial learning” where minoritized citizens are socialized into the extant racial social order.¹⁶¹ Unfortunately, when citizens remain silent to racist policing out of fear for their safety, they

not only waive Fourth and Fifth Amendment rights, but they also experience a deprivation of liberty that degrades their citizenship by robbing them of agency to define their own identity performativity.¹⁶² Yet when citizens protest aggressive policing, such as those who march in BLM protests to decry the brutal police killings of George Floyd and Breonna Taylor and so many others, they risk their Blackness being perceived as a threat and inducing a violent police response. This lose-lose situation, which undoubtedly will trigger a chilling effect on constitutional free speech,¹⁶³ perhaps explains why protestors who shout “Black Lives Matter” in affirmation of Black humanity are quickly met by heavily armed police officers ready for a fight.¹⁶⁴ Their Blackness is deemed fighting words.

To be sure, there are myriad reasons why anger might surface at the mere sound of BLM protestors marching down the street. In his treatise on the art of persuasion, *Rhetoric*, Aristotle defines anger as “desire, accompanied with pain, for conspicuous revenge for a conspicuous slight that was directed against oneself or those near to one, when such a slight is undeserved.”¹⁶⁵ Perhaps when white citizens or white police officers find themselves as the subject of an injustice that sits in the belly of American history, far beyond their reach, some perceive an undeserved “slight,” a disregard for and deprivation of their moral desert that is painful because it undermines their moral worth.¹⁶⁶ Perhaps from such

pain arises a hasty and irrational desire for revenge, for a rectificatory justice that remedies a seemingly unequal distribution of harm caused by the follies of our ancestors. Yet when neither the perceived offender nor the recipient of the perceived undeserved slight is the source of the injustice that animates their despair, the resulting brawl only deepens the wounds they share. Rather than inflict the specific pain of regret in the body of the other, such acts of revenge in response to anti-racist speech simply deepen the wounds of racial division resonant in the body politic.

At this point in the analysis, an underlying and unresolved tension in the First Amendment's treatment of racial issues remains unanswered—is the phrase *Black Lives Matter* or its symbolic representation in the bodies of Black protestors lining the streets of America unprotected public speech? Is *Blackness* “fighting words”? Perhaps the inconsistency among courts on the meaning of fighting words, coupled with the protections afforded police officers by the qualified immunity doctrine, explains why George Floyd's protest against the brutal policing tactics of Officer Derek Chauvin while lying on a Minnesota street—Mr. Floyd declaring with muffled voice, “Please, please, please, I can't breathe”—was met by Officer Chauvin's knee pressed ever more firmly upon Mr. Floyd's neck for eight minutes and forty-six seconds.¹⁶⁷ Perhaps Mr. Floyd's plea for dignity as a Black man under arrest in America was simply deemed the fighting words of an American brute.¹⁶⁸

¹⁶⁸ Although beyond the scope of this Essay, this argument also suggests an underexplored tension between (a) the First Amendment's lack of protection for “fighting words” that threaten harm to their target and an imminent breach of the peace, and (b) the Fourth Amendment's permission of deadly force by police officers in response to an imminent threat of serious bodily harm to themselves or others. See, e.g., *Nieves v. Bartlett*, 139 S. Ct. 1715, 1723 (2019) (holding that the presence of probable cause for an arrest defeats a First Amendment retaliatory arrest claim as a matter of law).

V. BLACK LIVES AND IMMINENT LAWLESSNESS

Unfortunately, Justice William Brennan got it wrong in *Texas v. Johnson* when he said that “the government may not prohibit the expression of an idea simply because society finds the idea itself offensive or disagreeable.”¹⁶⁹ The government *does* prohibit the free expression of certain ideas that society finds offensive or disagreeable. Maybe this explains why federal and local governments, and their police officers, have silenced protestors with curfews and threats of arrest,¹⁷⁰ all while onlookers yell in retort, “All Lives Matter.”¹⁷¹ Maybe this explains why the very idea of liberty and equality for Black and Brown Americans,¹⁷² the very notion of Black lives deserving human moral dignity,¹⁷³ the very suggestion of a Black feminist lens to critique socioeconomic injustice,¹⁷⁴

is often suppressed in mainstream discourse as the ideas of a lunatic fringe. Maybe it is the very idea of Blackness as something *other* than property that becomes fighting words in the eyes of American exceptionalism; a type of symbolic speech so harmful to white supremacy, so capable of inciting imminent lawless action, so disruptive of order-maintenance policing, that it is deemed a peril to the veil of white supremacy that looms over the American constitutional order, and consequently, is prohibited from the public square. Maybe this explains why police officers arrive to BLM protests with guns and tanks and shields and gas, long before the first stone has been thrown or the first rallying cry has been sung.

Maybe it is *Blackness as fighting words* that explains why some police officers believe they are authorized to use brutal force when citizens “insult” them with anti-racist rhetoric. Officer Sunil Dutta declared in a *Washington Post* opinion editorial in 2014, “[I]f you don’t want to get shot, tased, pepper-sprayed, struck with a baton or thrown to the ground, just do what I tell you.”¹⁷⁵ Such statements are not viewed as irrational articulations of implicit bias and deeply harbored racist ideas in policing culture, but instead they are deemed rational responses to disorderly behavior that reassert police authority,¹⁷⁶ limit resistance to law and order,¹⁷⁷ and instill fear among the citizenry that deters criminal activity. Yet Daria Roithmayr argues that such rationality is dubious; aggressive policing weakens community trust and undermines police legitimacy,

provoking dissent that merely leads to further aggression by police officers, a vicious cycle.¹⁷⁸

Maybe it is *Blackness as fighting words* that explains why some protests seem to inevitably devolve into the socially destructive and self-defeating act of rioting—“[a]n unlawful disturbance of the peace by [a crowd].”¹⁷⁹ To be sure, in many instances, it is extremists who seek to exploit peaceful protests for their own political ends.¹⁸⁰ But maybe, in other cases, America has simply failed to hear Black America speak. Maybe, as Martin Luther King, Jr., suggested in 1967,

It has failed to hear that the plight of the Negro poor has worsened over the last few years. It has failed to hear that the promises of freedom and justice have not been met. And it has failed to hear that large segments of white society are more concerned about tranquility and the status quo than about justice, equality, and humanity.¹⁸¹

After all, America boasts a rich legacy of violating the First Amendment rights of Black protestors. During the height of the Civil Rights Movement, across the segregated South, thousands of Black protestors were jailed for peacefully marching in dissent to a state-sponsored system of racial oppression.¹⁸² Indeed, Martin Luther King, Jr., was arrested and jailed in Birmingham, Alabama, in April 1963 for engaging in coordinated non-violent marches, sit-ins, and prayers in defiance of nationwide policies of racial segregation.¹⁸³ While imprisoned, King wrote the Letter from Birmingham Jail, in which he famously declared, “We know through painful experience that freedom is never voluntarily given by the oppressor; it must be demanded by the oppressed.”¹⁸⁴ However, before a demand can be answered, it must be heard.

¹⁸⁴ Martin Luther King, Jr., *Letter from a Birmingham Jail* 5 (Apr. 16, 1963).

We've been told that to be Black and poor in America is to speak the language of the unheard. But maybe not. Maybe to be Black and poor in America is to merely represent a subset of a larger faction of citizens whose identity is altogether silenced, a faction of citizens whose speech is deemed unworthy of constitutional protection because it will undeniably stir a fight in the heart of white supremacy. Maybe to be Black and poor in America is to have one's voice, one's protests, one's identity be given such slight social value as to always be outweighed by the immediate threat and direct harm to the preservation of the racial status quo, the privileges and "qualified immunities" of whiteness.¹⁸⁵ Indeed, even if one believes that the First Amendment, in theory, protects the free speech of Black citizens, the discretionary power granted to police officers to adjudicate such rights, in practice, renders freedom of speech in America a sham.

If we truly believe that Black Lives Matter, we must reckon with the anguish and guilt borne from America's legacy of racial oppression, rival emotions that have shaped a toxic relationship between Black Americans and the police.¹⁸⁶ Assertions of Black humanity have long ignited the rage of the patrol. And assemblies in defiance of white supremacy have long triggered breaches of the peace. Even more, we must protest the inequities that a racist color-consciousness has forged across the American landscape. We must embrace the human moral dignity of Black lives, even if it provokes anger in the heart of the privileged.¹⁸⁷ While some argue that such public displays of emotion are futile, undermining progress by "introducing or reinforcing divisions, hierarchies, and forms of neglect or obtuseness,"¹⁸⁸ Audre Lorde clarifies the moral utility of anger, declaring,

[A]nger between peers births change, not destruction, and the discomfort and sense of loss it often causes is not fatal, but a sign of

growth. My response to racism is anger. . . . It has served me as fire in the ice zone of uncomprehending eyes . . . [that] see in my experience and the experience of my people only new reasons for fear or guilt.¹⁸⁹

In other words, anger confers a sense of power and agency to harmed citizens as they wade through a messy and uncertain world. Our challenge lies not in squelching anger but in channeling such power toward constructive ends.

Finally, we must wrestle with the unresolved racial subtext of modern policing, a culture that exploits the ambiguities of the First Amendment to silence the legitimate public protests of minoritized citizens. Too often, police officers appear as mere instruments of the state when they respond to collective moral dissent with brutal violence.¹⁹⁰ Rather than stand idle or encourage protestors to retreat in fear of their safety, we must learn to embrace the pain of America's past as a catalyst for collective healing, "a tension in the mind" that can help us rise "from the dark depths of prejudice and racism to the majestic heights of understanding and brotherhood."¹⁹¹ In other words, if Blackness has in fact become fighting words, then we must fight back.

CONCLUSION

I learned at the age of fourteen that the police officers who killed Amadou Diallo were all acquitted after three days of deliberation, a cruel reminder of the power of whiteness in America.¹⁹² And I recently learned that in 2015, one of Amadou's killers was promoted to the rank of sergeant, despite objections from Amadou's mother.¹⁹³ Perhaps they

never heard her protest after the street brawl had come to an end. After all, when Amadou was killed, his mother did not have the modern megaphone of Twitter to amplify her son's name and mobilize the masses.

As for the protests currently making their way across the landscape, some have argued that they are merely reflective of American history—from the Boston Tea Party to the Revolutionary War to the Civil Rights Movement.¹⁹⁴ Notwithstanding, despite a history of racial oppression that stands alongside the transformative power of collective dissent, maybe in today's America, the phrase “Black Lives Matter” and other forms of public speech that affirm Black humanity have simply turned into fighting words. If that is indeed the case, maybe we should reconsider the utility of a policing culture that reinforces white privilege while promoting Black subjugation. Maybe police abolition is in fact the answer. To be sure, police abolition will likely occur as a gradual process of reform within the context of rethinking the entire criminal justice system.¹⁹⁵ But the weight of history suggests that police reform may not be enough.¹⁹⁶

In my view, one thing remains clear: if Blackness is fighting words, then we should heed the words of Frederick Douglass preached at Canandaigua, New York, on August 3, 1857:

If there is no struggle there is no progress. Those who profess to favor freedom and yet depreciate agitation are men who want crops without plowing up the ground, they want rain without thunder and lightning. They want the ocean without the awful roar of its many waters. This struggle may be a moral one, or it may be a physical one, and it may be both moral and physical, but it must be a struggle.¹⁹⁷

Blackness as Fighting Words

Black humanity amidst the perpetual and unjustified assault on Black lives, until the rain and thunder and lightning agitate a wounded American consciousness and fragile American soul, folks who react to the words “Black Lives Matter” with retaliatory violence can, as they say in the South Bronx, “catch these hands.”
